

TOP TIPS FOR INFORMATION PROTECTION BEST PRACTICE

1

DEFINE WHAT'S VALUABLE TO YOU

You can't protect what you don't understand, Start by ranking your information by importance

2

PROTECT THE OBVIOUS

With email and web being the main exit routes, apply content control to scupper their getaway

3

ENCRYPT

Render your valuable information useless if it falls in to the wrong hands

4

DECIDE WHAT DLP MEANS TO YOU

Data Loss Prevention has many faces. Define your end goal and align your strategy to suit.

5

WHO IS ACCESSING WHAT, WHERE AND HOW?

Understand and control your information access to protect against both well meaning and malicious insiders

6

MAKE STAFF THE SOLUTION NOT THE PROBLEM

Ensure all teams are educated, trained and made aware of the importance of their role in information security

7

BE PREPARED FOR THE WORST

What would you do? Are you ready to mitigate and repair once a breach has struck?

8

IT'S NOT A DESTINATION, IT'S A JOURNEY

Ensure regular reviews, ongoing assessments and repeated checks for maximum protection

9

IS THERE A WEAK LINK?

Who are you trusting with your information in your supply chain?

10

SET YOUR STRATEGY

INFORMATION PROTECTION

Information is a valuable asset that attracts the worst in human nature, be it the Cyber Criminal, the malicious insider or the trusted supply chain. Credit card numbers, banking credentials, payroll details or a secret sauce recipe - it all has a price on the black market

IDENTIFY

How do I understand what of my data is sensitive, who has access to it and where it is?

CONTROL

How can I manage, control and safeguard my information?

NOW YOU HAVE INFORMATION PROTECTION COVERED, ASK OUR TEAM FOR THE

10 TOP TIPS FOR CYBER DEFENCE
